Allyson -

Lots been going on with Dimock this week. Here is the latest:

I've attached the link to the joint EPA, Governor Mead and Tribe press release. Additionally, we shared test results to residents from latest sampling. Also attached is the PR on the Administrative Record is available for public review.

I'm out of the office today, but if you want to talk give me a buzz on Monday.

I'll be sure to include you on my list of interested staff for future information and announcements.

Have a Fab weekend.

Pamela

Of recent:

On Wednesday, March 14, 2012, EPA shared with residents the results of testing for the first 11 homes sampled during the week of January 23 in Dimock, PA. Each resident was provided with their sampling results. There were detections of some compounds, but not at levels that could present a health concern. Some re-sampling is planned to better characterize the water quality of a handful of wells.

EPA has offered to meet with residents individually to go over their data. As further data becomes available for the remaining homes, we will share the results with homeowners.
